The Recidivism Index quantifies the rate of re-offending of a specified group of offenders over defined follow-up periods after release from a custodial sentence or commencement of a community-based sentence. The RI analysis gives re-conviction rates over 12 and 24 months for those released from prison, or commencing community-based sentences. RIs are reported for all offenders in each of the above categories, as well as for sub-groups within categories.

**Notes:** Care and protection residential placements are used when the behaviour of a child or young person is putting themselves or others at risk, or when there is no suitable community placement available to take care of the child or young person's complex needs. The data shows the total number of admissions to these residences.

A child or young person may have more than one admission to these residences during the same time period (eg if they transferred between residences). In certain circumstances low numbers may potentially lead to individuals being identified. Due to these privacy concerns, numbers for some tables have been suppressed or aggregated. Secondary suppression rules have also been applied when required. Suppressed numbers have been replaced by an 'S'.

## BACKGROUND INFORMATION

**Table 30 - New Zealand population by Ethnic group**

Ethnic Groups	Number of People	% of total population <sup>1</sup>
European ethnicities	2,969,391	74
Māori	598,605	14.9
Asian	471,708	11.8
Pacific peoples	295,941	7.4
Middle Eastern / Latin American / African	46,953	1.2

Note: More than half of Māori (53.5% or 320,406 people) identified with two or more ethnic groups, compared with 46.5% who identified with Māori only.

In the 2013 Census, people were able to identify with more than one ethnic group, therefore the percentage of total population including all ethnic groups adds up to 109%.

**Notes for Table 29 and tables 32 to 35**

It cannot be assumed that the ethnicity classification used to construct this table necessarily aligns neatly with the current Statistics New Zealand classification of ethnicity. Ethnicity details recorded in MSD's systems have been gathered under a variety of classification schemes as clients came into contact with the Ministry. Multiple ethnicities may be chosen by an individual as fits their preference or self-concept. These selected ethnicities are then prioritised into a hierarchy. The Māori ethnicity has the highest priority in this hierarchy, followed by Pacific peoples, NZ European has the lowest priority
