

Global Day of Action on Military Spending

12 April 2011

Last year global military expenditure was more than \$1,630 billion (US), on average nearly \$4,500,000,000 a day.

By way of contrast, an average of more than 24,000 children under the age of five die every day from mainly preventable causes – lack of access to adequate food, clean water and basic medicines.

This is one of the prices paid, the collateral damage that is seldom talked about, for maintaining armed forces in a state of combat readiness around the world.
